WIE Externship Title: Associate  
Location: Remote/New York, NY

Department/Group: Science, Technology and Business Innovation  
Reporting to: Alexandros Karaiskakis, PhD

Contact: Michele Smith, Head of People  
Date Posted: September 7, 2021

Travel Required: No Travel Required  
Posting Expires: September 30, 2021

Experience requested: Interest in energy and energy markets; business, data analytics, research experience a plus

Applications Accepted By:

EMAIL: msmith@bioenergydevco.com
Subject Line: WIE Externship - Associate

ABOUT US: Bioenergy Devco is a global leader in the design, engineering, construction, financing and operation of advanced anaerobic digestion facilities. With a 20-year track record of using precision technology to insure and guarantee performance at the more than 220 facilities it has developed worldwide, BDC’s anaerobic digestion technology is an environmentally sound process that creates a true source of renewable, carbon-negative energy for pipeline and vehicle use. In recycling organic material into natural gas, BDC creates circular economies in local communities, helping cities and companies achieve decarbonization, zero waste and renewable energy goals, while reducing air and water pollution, and creating healthier soils.

Job Description

ROLE AND RESPONSIBILITIES

Bioenergy Devco (BDC) uses anaerobic digestion to recycle organics once destined for incineration or already crowded landfills. This process creates renewable natural gas and healthy living soils.

The Associate will be responsible for tasks involving research and report writing. The research will include market and policy studies in energy related sectors to generate actionable reports and insights for strategic internal use. Areas of research may include policy and market information on federal, state and local policies that will benefit anaerobic digestion, renewable energy utilization required by state, and communicating science-based data to share the benefits of our technology in reducing carbon and creating more sustainable energy systems. Interns may also assist with developing and expanding our internal policy and mapping database.

We are open to having more than one Associate as we successfully did in 2020.

EXTERNSHIP REQUIREMENTS

The externship will require no less than 15 to 20 hours per week of time. Candidates can work remotely, but Bioenergy Devco expects interns to be available to present their work once or twice a week, as needed, as well as an end of internship presentation to Company Executives. The successful candidate will be a highly motivated self-starter with an entrepreneurial spirit.

PREFERRED SKILLS

Experience conducting research, Microsoft Office.
